- Order No. 681 of May 25 (2020) from Danish Ministry of Environment and Food on ban of per- and polyfluoroalkyl substances (PFAS) in paper and cardboard food contact materials.

Field of Application
The plates can be used with all kinds of foods up to 90 °C.

Limitations of the material:
Paper is a fibrous material and as the surface of the plates have no plastic lamination, they are not suitable for long-term use.

The plates are not suitable to be used in a microwave oven.

Different kinds of food can have an impact on the physical behaviour of the paper plate. Duni's recommendation is for the customer to test their application for their needs.

Product Safety
Analysis of the material performed by an independent institute shows the tested sample meets the requirements of the German LFGB and Regulation (EC) No. 1935/2004. See details in Annex I.

No PFAS (Per- and polyfluoroalkyl substances) are intentionally added.

Please be advised that Duni AB does not add anything into the product.
