LOOMPA

● Reference : 400202311

● Reference : 400202312

● Reference : 400202313

● Reference : 400202314

LOOMPA impresses with its modern design and soft and adjustable light, ideal for elegantly illuminating any space, indoors or outdoors. Its sturdy pole combined with its geometric head creates a striking contrast that enhances its contemporary look.

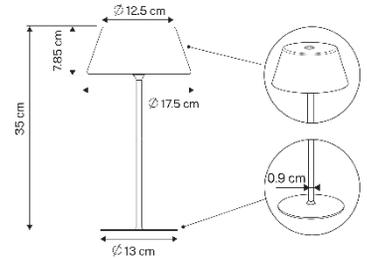

- **Stand-alone** : with its 1800 mAh lithium-ion battery built into the head, LOOMPA offers total freedom of positioning and is ideal for lighting all your spaces without the need for cables.
- **Dimmable** : adjust brightness to 3 intensity levels in a single movement using the discreet touch-sensitive button on the head.
- **Design** : its geometric head is set off by a slender yet solid pole resting on a metal base, creating a striking contrast.
- **Water-resistant** : with its IP 44 rating, LOOMPA is splash-proof and perfect for illuminating indoor and outdoor spaces.
- **Shockproof** : its robust, high-quality materials make LOOMPA perfect for outdoor use, whatever the weather.
- **Practical** : LOOMPA recharges easily via a USB-C port (cable included).

Height: 31 cm
Base diameter: 13 cm

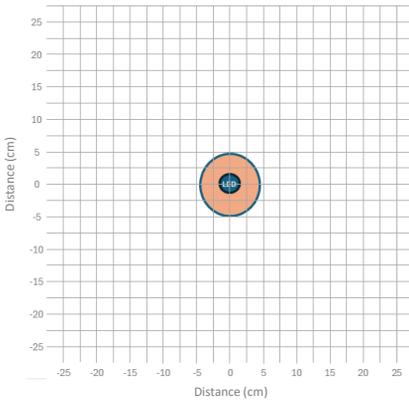

Materials : PE (polyethylene) head / metal mast and base

Warranty : 2 years

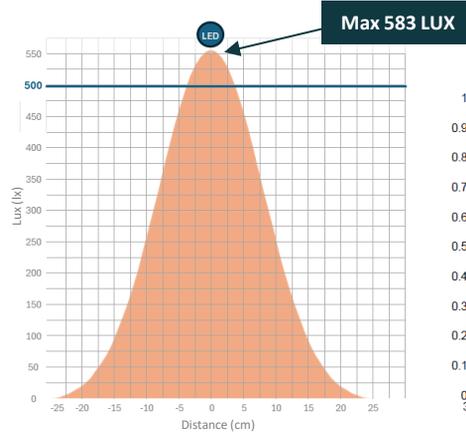

Features

Measurement in lux on the work surface from a top view at 25 cm :

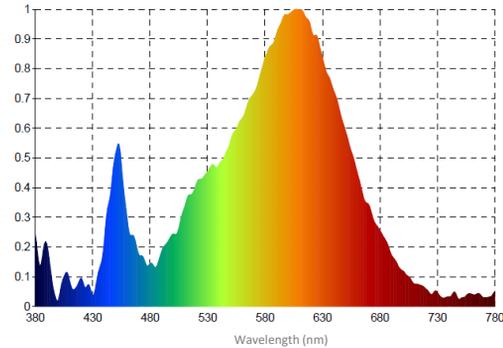

> 500 Lux

Measurement in lux on the work surface from a side view at 25 cm :

Measurement in nanometers of the light spectrum

USB port	Yes, only for charging the lamp battery (cable included)			
Net weight (kg)	0.550			

ABOUT UNILUX

Founded in 1952, UNILUX is a French company specializing in lighting and ergonomics. Over the past 25 years, UNILUX has become a benchmark in the field of lighting in France and throughout Europe. In 2000, UNILUX joined the French group HAMELIN, a European leader in stationery. The company modernizes and evolves to become a creator of ambiance and well-being.

OUR EXPERTISE

Task lighting

In the office, we are often exposed to constant artificial lighting. Poor lighting quality can lead to headaches, sleep disturbances, and decreased concentration. According to a recent study, only 34% of workspaces achieve the recommended illuminance level of 500 lux by Occupational Medicine, in accordance with DIN EN 12464-1* standard. Task lighting is frequently used to provide additional brightness when the primary lighting is insufficient.

* Standard setting the limits that workplace lighting must adhere to.

Our tips to light up your workspace :

- Position your desk near windows to benefit from natural daylight and reduce eye fatigue.
- Ensure that the lamp head is positioned at least 35 cm above the work surface.
- Place the lamp on the opposite side of the hand that holds the mouse or writes.
- Position the lamp for easy adjustment.
- Ensure that your lamp is placed to avoid glare on screens and prevent direct glare in your field of vision.

ENVIRONMENT

Unilux focuses on sustainable development and takes concrete measures to reduce its environmental footprint and best meet the evolving expectations of its consumers.

We are notably committed to reduce our greenhouse gas emissions by 29% between 2021 and 2030 in response to the "Net Zero Carbon Emissions by 2050" challenge. Eco-design, emissions reduction, and continuous improvement are at the core of our concerns.
